Juventus Leverage Brain Games To Boost Soccer Players' Performance

"Imagine being able to play a video game using only the power of thought and, thanks to it, train your ability to focus, thus enhancing sports performance," Carolina Chiappero, head of innovation at Juventus

Exploring neurotechnology for tracking and improving athletes' neurofitness levels

Atlanta United FC Sports Science Director says: "Tired players have a decreased level of alertness that presents itself in i-Brain"

BBC SPORT

The 'brain gym' helping elite footballers improve their focus

RUSG academy coach says: "It is the best solution for the moment to also train the brain to be more clever on the field, to make decisions in quick time."

Forbes

Liverpool FC's Brain Games Are Just The Start Of A Neuroscience Revolution

"Every player should use it. If everybody uses it, the focus levels are going to be higher and the results are going to be better"

FRONT OFFICE SPORTS

Why MLS, NBA, and NHL Clubs Are Investing In Brain Training

"iBrain has allowed us to increase our exposure to different actions within a game without that same risk of having them out on the field striking a ball"

WorldSoccer

All in the Head

i-BrainTech deemed 'the future of football.' "Sonkin is not the first person you would associate with a five-time Ballon D'Or winner. And yet, he might be the man behind football's next big step."

Trusted by the Pros

Duccio Ferrari Bravo

Juventus F.C. Head of Sport Science, Research & Development

"The most impressive aspect of i-BrainTech is that it is a video game controlled exclusively by brain impulses, without any movement on the part of the player, focusing all attention on the mental process underlying the motor task while at the same time being very engaging for those using it."

Dr. Ryan Alexander

Atlanta United FC Director of Sports Science

"By implementing i-Brain, we feel we are better supporting our players with multiple modalities of technical, intentional training stimuli without significantly increasing the risk for injury"

Dr. Brian Forsythe

Team Physician Chicago Bulls, Chicago White Sox, & Chicago Fire F.C.

"i-BrainTech is a leader in the field of Sports Performance. Training the brain constitutes the new paradigm in sports medicine and neuromuscular rehab."
